

My name is L'Vonne McMillan-Smith and I have been blessed to share my testimony of healing. For a few months in 2015 I consulted with my doctor of back pain, dizziness, foot numbness and pain in my right hand. I was sent to the Neurologist and Spine Doctor. I had numerous tests done CAT scan and X-rays to determine what the diagnosis was and how to address the pain that I was having. I went to physical therapy and was able to learn exercises for my lower back pain. After visiting the Spine doctor, she diagnosed me with a Muscle Disorder. She requested an x-ray of my right hand, and it determined that my bones were separating in my wrist. So I was to wear a brace for 6 weeks and than return in January.

On January 3, 2016, Lady Shebra and I greeted each other after Sunday morning service and she saw me wearing the hand brace, She asked why I was wearing it and I explained that my bones were separating and I had to wear it for 6 weeks. She asks if I could remove the brace and said do you mind if I pray for you? I said I was fine with her praying over it. Lady Shebra and I held hand to hand and she began to Pray. Commanding Healing according to Isaiah 53:5. Then she asks me to do something that was difficult for me to do with my hand. Prior to her praying I was unable to bend my wrist back and forth. So I started moving my wrist and hand around and I didn't feel any pain. We continued in prayer and this time I could feel the bones in my hand moving. Lady Shebra asked, "Can you feel the bones shifting?" I answered, "Yes". I closed my eyes and was in total agreement with what was about to happen. I could hear Lady Shebra praying and the Anointing overwhelmed me and I was in God's Presence for a while, I am not sure of how long but I can say that when we were praying I was standing and Lady Shebra was with me. I could hear familiar voices but was not with them to respond. I just had peacefulness around me. When I came to I was sitting in a chair and my Husband was behind the chair and my God-Sister was standing in front of me.

Days later I was able to not only move my wrist but I was able to move furniture, pick up the laundry basket, hold my daughter and carry bags. These were normal activities that I was not able to do prior to her praying for me. I knew I was healed and not only healed but it was made whole. I laugh because when I moved the bed from one end of the room to another I pushed some of the wall apart and I said, "Wow, God gave me super strength." I knew than that only God could have healed me like this. I posted on Facebook to Lady Shebra the experiences that I was having and how I did not feel the pain any longer. I informed her that I have a follow up doctor's appointment and I will let her know the outcome.

On January 22, 2016, I went to see the Spine doctor for the follow up appointment. She reviewed my history and she looked at my right foot and than she was about to end our session and I asked, "Are you going to look at my wrist?" She looked at my history and answered "Oh yes, you were having pain in this area" and she pressed down, no pain. She went to the middle of my hand, no pain. The doctor said "Wow, that's amazing because you were in a lot of pain just from me touching your hand." I said, "Yes, one of my church members prayed healing over my hand a few weeks ago and I have not had any pain since." My doctor turned to me and said, "The prayers of the righteous availeth much." I said, "Amen, God is good."
